### **DETAILED ACTION**

This Office Action is responsive to the applicants' election filed on September 26, 2005.

#### ***Election/Restrictions***

1. Applicants' election with traverse of species of Figs. 1 and 2, claims 14, 16-21 and 27 being readable, in the reply filed on September 26, 2005 is acknowledged. This is not found persuasive because the applicants claim recite several limitations which are mutually exclusive to the different species as noted by the examiner in the Restriction Requirement mailed on August 22, 2005. The search required for any one of the species would not be required for the remaining species. The requirement is still deemed proper and is therefore made FINAL.

This application is in condition for allowance except for the presence of claims 15 and 22-26 to an invention non-elected with traverse in the reply filed on September 26, 2005. Claims 15 and 22-26 should be canceled.

#### ***Drawings***

2. Applicants are required to shade the *lining (6)* with the shading scheme with represents an *elastomeric (rubber)* (see MPEP §608.02). Applicants are required to show clearly the apertures (4, 5) being filled by the material (*elastomeric/rubber*) of the lining (6).

#### ***Claim Objections***

3. The claims 14, 16-21 and 27 are objected to because they include reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in

Art Unit: 3748

the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

### ***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of nine patents: Sackett (U.S. Patent Number 2,700,936), Alcock (U.S. Patent Number 2,862,454), O'Connor (U.S. Patent Number 3,139,035), Berger (U.S. Patent Number 3,300,811), Schlecht (U.S. Patent Number 3,435,772), Underwood et al. (U.S. Patent Number 5,171,139), Knobelspies (Publication Number DE 2,541,779), Agarkov et al. (Publication Number JP 61-180512), and Jaeger (Publication Number DE 4,403,598 ), each further discloses a state of the art.

### ***Conclusion***

This application is in condition for allowance except for the following formal matters: as set forth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
